

Real-World Problems, Data and Visualizations Using BRIDGES

Kalpathi Subramanian¹, Erik Saule¹, and Jamie Payton²
krs@uncc.edu, esaule@uncc.edu, payton@temple.edu

¹The University of North Carolina at Charlotte

²Temple University

CCSC-SE January, 2022

Agenda

- Introduction [20 min]
 - Participant introductions
 - What is BRIDGES and how does it help?
- A First Example [15 min]
- A Tour of BRIDGES [20 min]
- Break [5min]
- Discussions [25 min]
- Workshop Survey, Opportunity to Participate [5 min]

BRIDGES to Improve CS Education through Engagement

Motivation

Attrition rates in early foundational courses are high (40-60%), need to improve student engagement, and demonstrate the potential of Computer Science to incoming freshmen/sophomore students

BRIDGES' approach

- Bring **real-world datasets** into the classroom.
- **Visualizations** of *student generated* data structures, interactions, algorithm performance/complexity.
- Student output shared (with friends, family) via **web link**

BRIDGES provides engaging Input and Output

External Data

Student Program

```
main () {  
  bridges <-- Create Bridges Object  
  obj_list <-- Get Data(data source)  
  ds <-- BuildDataStructure (obj_list)  
  bridges.setDataStructure(ds)  
  bridges.visualize()  
}
```

Graph-Bacon Number

Shortest Path - Open
Street Map

Binary Search Tree -
Earthquakes

Kd-Tree -
Image Coding

BRIDGES in Data Structures Course

What is hard in a Data Structure course?

- Debugging is haaaard.
- I don't understanding what the data structure looks like!?
- Does any of this matter in the real world?

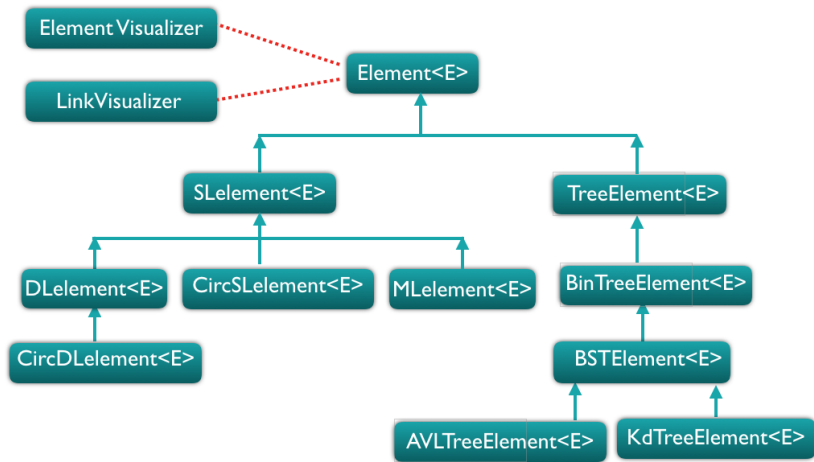

Indexing USGS Earthquake

Bacon Number [IMDB Data]

BRIDGES Element Hierarchy (Lists, Trees, Graphs)

BRIDGES in Algorithms Course

What is difficult in an Algorithm class?

- Complexity is confusing!
- I am never going to use any of these crazy things.
- Why is he still talking about complexity?

Sorting Benchmark

Shortest Path (OSM)

Mountain Path (DP)

BRIDGES in CS1/CS2 Courses

What is difficult in a CS1 course?

- Hello World is BOOOOOOOOORING...
- We added two arrays of integers, I am soooo impressed...

Graphical Patterns and Analysis

Games

Students in BRIDGES sections gained more knowledge

Fall 2014

Spring 2015

Students in BRIDGES sections performed better in follow on core CS

Figure: Comparing long-term student achievement between students who used the BRIDGES toolkit in the Data Structures course vs. Control group. The evaluation was performed with 2 cohorts of students (Fall 14, Spring 15). Analysis performed Spring 2019.

Students using BRIDGES appreciate CS better

Thank you!

Why adopt BRIDGES?

- Well tested: over 2000+ students, 20+ institutions
- Increased engagement
- A growing set of pre-designed assignments
- Full Support from the BRIDGES team
- Stipends available for adopters

How to adopt? Contact us!

- esaule@uncc.edu
- krs@uncc.edu
- payton@temple.edu

Support

This material is based upon support from NSF DUE-1726809.

A Tour of BRIDGES[15-20 min]

Open up your laptops and try out some of the BRIDGES examples and their outputs from a sampling of BRIDGES assignments

Discussion [15-20 min]

Possible Talking Points

- What issues do you face in teaching (early CS) courses?
- Can tools like BRIDGES be helpful? What are the hurdles?

BRIDGES Survey (25min)

Workshop Survey

https://uncc.qualtrics.com/jfe/form/SV_bgxw85Ztuirjltz

BRIDGES Participation - Opportunity

- BRIDGES under active development - funded by an NSF IUSE grants - **to disseminate BRIDGES to external users!**
- Need help in **adopting, contributing, and extending** BRIDGES.
- Build **engaging assignments** and data sources that also reinforce CS rigor.
- Use BRIDGES in the classroom, collect data and provide feedback; all evaluation materials provided through online Qualtrix surveys by project evaluator.
- **Stipends** available for instructor; alternately **TA support** can be provided.
- Full technical support provided, and interaction with Bridges team/community, monthly user meetings.
