

How BRIDGES can help with Engagement

Kalpathi Subramanian, Erik Saule,
krs@uncc.edu, esaule@uncc.edu,

¹The University of North Carolina at Charlotte

BRIDGES Workshop, May 23-25, 2022

Engagement and Motivation

- Well understood that student engagement is an important predictor of student achievement.
- Engagement can span many dimensions¹:
 - skills engagement
 - participation/interaction engagement
 - emotional engagement
 - performance engagement
- Engagement and motivation are closely tied to each other
- How do we motivate and engage students?
- What engagement strategies can we use?

¹Handelsman et al., A Measure of College Student Course Engagement, Journal of Educ. Res., 2005

Engagement Strategies

- **Active Learning:**

- Pair Programming
- Flipped classroom
- Group work/collaboration/Light Weight Teams
- Quizzes

- **Content Based**

- Real world data integrated into curriculum, demonstrate relevance
- Align with student interests, values, social relevance

BRIDGES focuses on content based engagement

The MUSIC Model of Engagement

Engaging Students: Experiences from an OOP Course ³

Two semesters of a project based OOP course, using student reflections after each course module

- **eM**powerment: Project choice, freedom to be creative, experimentation and tinkering
- **U**sefulness: Working with real-world data/tools, team environment
- **S**uccess: Assignments with clear instructions, predictability, reflect on personal successes/failures, feedback
- **I**nterest: Fun factor, games, real world images used as part of course
- **C**aring: Sensitive to student needs, prompt feedback, deadline flexibility

³Subramanian et al., Influence of Course Design on Student Engagement and Motivation in an Online Course, ACM SIGCSE 2020

Engagement Using BRIDGES: Visual and Interactive

- BRIDGES generates **visualizations** of data structures (**that students implement!**), algorithm outputs as a mechanism for engaging students.
- Visualizations of classic CS concepts can be helpful in making them real and more meaningful.
- Student feedback has been very positive, appreciating the features of BRIDGES that enables them to **see what they code and produce**.

Indexing USGS Earthquake

Bacon Number [IMDB Data]

Engagement Using BRIDGES: Use Real-World Data

- Using **real-world data** in course work is an important engagement tool
- Students respond to working with data from real-world scenarios/data: weather/climate, maps, medical, census, books, music, videos, games
- Data is everywhere, the harder part is
 - Accessing data in a ready-to-use form for course work
 - Mapping the right data to course work to meet objectives.
- BRIDGES supports a number of datasets ready to use in early CS courses:
 - **Earthquake Data:**
List<EarthquakeUSGS>eq_list = bridges.getDataSource().getEarthquakeUSGSData(100)
 - **IMDB Actor-Movie Data:**
List<ActorMovieIMDB>am_list = bridges.getDataSource().getActorMovieIMDBData(1813)
 - **Open-Street Map Data:**
OsmData osm_data = bridges.getDataSource().getOsmData("Charlotte, North Carolina", "default")
